| Designated people with access to non-portable locked container for medication (minimum of 2 per school) | Mrs S Nash Mrs C Hale Mrs Z Mead |

Policy for supporting pupils with medical needs in school

Rationale

This policy outlines the correct procedures and protocols DLPT Academies will follow to support pupils with long-term and/or complex medical conditions, whilst safeguarding staff by providing clear and accurate guidance for all staff to adhere to.

This policy will be readily accessible to parents and Academy staff, and will be reviewed annually, to keep up-to-date with statutory and non-statutory guidance and legislation.

The next review of this Policy Document will be December 2019.

1. School Information

Mrs S Connell, the DLPT Chief Executive Officer (CEO), has overall responsibility for pupils with medical needs but the Diamond Learning Partnership Trust (DLPT) delegates the responsibility for supporting pupils with medical needs to the Heads of Schools, Headteachers and SENDCos.

See separate cover sheet (or Appendix E) for staff responsible for the day to day support and storage arrangements for medications in each individual school within the DLPT.

Relevant legislation and guidance

Managing Medicines in Schools and Early Years settings (2004)

Disability Discrimination act 1995 & Special Educational Needs and Disability Acts (2001 & 2005)

The Education Act 1996

Health and Safety at Work act 1974

Management of Health and Safety at Work Regulations 1999

Medicines Act 1968

Supporting Pupils at School with Medical Conditions (2014)

Section 100 of the Children and Families Act 2014 places a duty on Governing Bodies to make arrangements for supporting pupils with medical conditions at school. This is because pupils with long-term and complex medical conditions may require:

- on-going support, medicines or care whilst at school to help them manage their condition;
- monitoring and intervention in emergency circumstances.

The governing body must further comply with their duties under the Equality Act 2010 towards disabled children and adults.

Policy Implementation

This policy has been drawn up in accordance with the DfE guidance 'Supporting pupils at school with medical conditions' (Dec 2015)

Aims:

- To ensure arrangements are made for children with medical conditions to receive proper care and support whilst meeting our legal responsibilities;
- To provide guidance to all teaching and non-teaching staff members, ensuring staff are fully supported in carrying out their role to support pupils with medical conditions, including the procedure in an emergency situation;
- To identify the areas of responsibility and roles to all parties involved in the arrangements made to support pupils at school with medical conditions, including pupils, parents, staff, school nurses, Head teachers, Governing Bodies etc; and
- To ensure procedures are followed to limit the impact of pupils' educational attainment, social and emotional wellbeing that can be associated with medical conditions, both on site and during off site trips.

Procedure when the school is notified of a medical condition:

- There could be a number of ways in which a school will be notified when a child has been identified as having a medical condition that requires support.
- The Head teacher should take the necessary steps to co-ordinate a meeting to discuss the child's medical support needs. The meeting will involve key Academy staff, the pupil, parents, relevant healthcare professionals and other medical / health clinicians as appropriate.
- The School Nursing Duty Desk will be able to advise on training for staff and other matters to support children with medical needs. Involvement from the School Nursing service can be requested through the Early Help Hub.
- A decision will be made as to whether an Individual Health Care Plan will be created for the child.
- For children new to the Academy, support arrangements will be in place in time for the start of the relevant school term.
- In cases where the child moves to the Academy mid-term, or receives a new diagnosis, the school will make every effort to ensure the arrangements are in place within two weeks.

The school will not have to wait for a formal diagnosis before providing support to pupils. In cases where a pupil's medical condition is unclear, or where there is a difference of opinion, judgements will be made about what support to provide based on available medical evidence and through consultation with parents.

Individual Health Care plans

An Individual Health Care Plan is a document that sets out the medical needs of a child, what support is needed within the school day and details actions that need to be taken within an emergency situation. They provide clarity about what needs to be done, when and by whom. The level of detail within the plans will depend on the complexity of the child's condition and the degree of support needed. This is important because different children with the same conditions may require very different support.

Individual Health Care Plans may be initiated by a member of Academy staff, the school nurse or another healthcare professional involved in providing care to the child.

When deciding whether an Individual Health Care Plan is appropriate and proportionate, Academies should follow the steps below:

Stage 1: Gathering the information

- The Headteacher or senior member of staff co-ordinates a meeting between the school, healthcare professional and parent to discuss the medical support needs of the pupil.
- Pupils should be involved when possible.
- The meeting should ascertain whether an Individual Health Care Plan is appropriate, as not all children will require one.
- All parties should agree, based on the evidence, as to whether an Individual Health Care Plan would be suitable. However, the Head teacher is best placed to take the final view if consensus cannot be reached.
- The decision should be based on:
 - whether there is a high risk that emergency intervention will be needed;
 - whether the medical condition is long-term and /or complex;
 - whether the child is returning to school following a period of hospital education or alternative provision (including home tuition);
 - whether medical conditions are likely to fluctuate.

A member of the school staff will be identified as being the person who will provide support to the pupil.

Stage 2: Developing an Individual Health Care Plan

The purpose of an Individual Health Care Plan is to capture steps which the school will take to help the child manage their condition and overcome any potential barriers to getting the most from their education.

Once the decision has been made to create an Individual Health Care Plan, the outlined process should be followed: See appendix A for the DLPT's Individual Health Care Plan proforma.

Roles and Responsibilities

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. Partnership working between Academy staff, healthcare professionals, parents and pupils will be critical to ensure that the needs of pupils with medical conditions are met effectively.

The Headteacher or Head of School is responsible for:

- ensuring that a policy is in place to meet the needs of children with medical conditions;
- implementing this policy effectively and ensuring that **all** relevant staff members are aware of how to support pupils with medical conditions including their role in its implementation;
- ensuring there are sufficient trained members of staff available to implement the policy and deliver against all Individual Health Care Plans, including a contingency and emergency situations;
- ensuring all staff who need to know, are aware of the child's condition;
- safeguarding school staff by appropriately insuring them and making them aware that they are insured to support pupils with medical conditions;
- ensuring that the school nursing service is contacted in the case of any child who has a medical condition that may require support but who has not yet been brought to the attention of this service;
- ensuring that staff have received suitable training and are competent before they take on responsibility to support children with medical conditions.

Healthcare Professionals are responsible for:

- Notifying the Academy when a child has been identified as having a medical condition which will require support in school. This should, where possible, be done before the child starts at the school.
- Take a lead role in ensuring that pupils with medical conditions are properly supported in school, including supporting staff on implementing a child's plan;
- Working with Headteachers / Head of Schools to determine the training needs of Academy staff and agree who would be best placed to provide the training.
- Confirming that Academy staff are proficient to undertake healthcare procedures and administer medicines.

Suitable cover will be provided in the absence of the school nurse / healthcare professional.

Academy Staff (teaching and non-teaching) should:

- Understand that any member of Academy staff may volunteer or be asked to provide support to pupils with medical conditions, including the administering of medicines although they cannot be enforced to do so, this is a voluntary role;
- Understand the role they have in helping to meet the needs of the child with a medical condition;
- Work towards or complete targets and actions identified within the Individual Health Care Plan.

Pupils should:

- provide adequate information about how their condition affects them;
- be fully involved in discussions about their medical support needs; and
- comply with their Individual Health Care Plan.

Parents should:

- provide medicine and equipment and ensure they or another nominated adult are contactable at all times;
- provide sufficient and up-to-date information to the school about their child's medical needs; and
- be involved and assist in drafting and developing their child's Individual Health Care Plan.

The Local Authority is responsible for:

- promoting cooperation between relevant partners such as governing bodies of maintained schools, proprietors of academies, clinical commissioning groups and NHS England, with a view to improving well-being of children so far as relating to their physical and mental health and their education, training and recreation;
- providing support, advice and guidance, including suitable training for school staff to ensure that the support specified within the Individual Health Care Plans can be delivered effectively;
- working with schools to ensure that schools support pupils with medical conditions to attend full time; and
- making alternative arrangements where pupils would not receive a suitable education in a mainstream school because of their health needs, when it is clear that a child will be away from school for 15 days or more because of their health needs.

Emergency Procedures

As part of general risk management processes, all schools within the DLPT have the following arrangements in place for dealing with emergency situations:

- All pupils in the school should inform a teacher immediately if they think help is needed;
- The pupil's Individual Health Care Plan will clearly define what constitutes an emergency and will explain what to do, including ensuring that all relevant staff are aware of the emergency symptoms and procedures for the individual pupil;
- When a pupil needs to be taken to hospital, staff will stay with the child until the parent arrives. If a child is taken to hospital by ambulance, staff will accompany the pupil.

All staff need to understand the local emergency services cover arrangements and ensure that the correct information is provided for navigation systems.

Staff Training and Support

Any member of Academy staff providing support to a pupil with medical needs must have received suitable training. Staff training needs will be identified during the development or review of each pupil's Individual Health Care Plan. Staff who provide support to pupils with medical conditions will, when possible, be included in the meetings where this is discussed. The Healthcare Professional will lead on identifying and agreeing with the school what type and level of training is required. It will be the school's responsibility to arrange training and ensure that this remains up-to-date. The Healthcare Professional, including the school nurse, will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

The training must be sufficient to ensure all staff are competent and have confidence in their ability to support pupils with medical conditions, and to fulfil the requirements set out in the Individual Health Care Plan. They will need to understand the specific medical conditions they are being asked to deal with, their implications and preventative measures.

Staff must not give prescription medicines or undertake health care procedures without appropriate training (including amendments to the Individual Health Care Plan). A first-aid certificate does not constitute appropriate training in supporting children with medical conditions.

As well as individual training, the school will make arrangements for whole school awareness training and induction arrangements for new members of staff. This will include preventative and emergency measures, so that staff can recognise and act quickly if a problem occurs.

The child's role in managing their own medical needs

Pupils may be competent to manage their own health needs and medicines. Academy staff will discuss individual competencies with parents and ensure the Individual Health Care Plan reflects the pupil's competencies for managing their own medicines and procedures.

Competent pupils will be allowed to carry their own medicines and relevant devices, or will have access to their medicines for self-medication quickly and easily, wherever possible. Pupils who can take their medicines themselves may require an appropriate level of supervision. When it is not appropriate for the pupil to self-manage, staff will help to administer medicines and manage procedures for them.

If a pupil refuses to take their own medicine or refuses to carry out necessary procedures relating to their medical needs, staff will not force them to do so, but will follow the procedure agreed within the pupils Individual Health Care Plan. A member of the Senior Leadership Team will be responsible for informing the pupil's parents, so that alternative options can be considered for future situations.

Procedures for the managing of medicines

Medication and request forms should be handed to staff by parents or carers, never the child. All medication should be provided in the original packaging with the prescriber's instructions.

In order to manage a pupil's medical conditions effectively, members of staff will not prevent pupils from eating, drinking or taking breaks when required.

The following procedures will be followed to manage medicines on-site:

- a pupil under 16 should never be given prescribed or non-prescribed medicines without their parent's written consent. *(See appendix B for the DLPT parental agreement for administering medicine);*
- only prescribed medicines that are in-date, labelled and include instructions for administration, dosage and storage will be accepted by the school. In most circumstances, the medicines should be provided in the original container and dispensed by a pharmacist, with the exception of insulin, which will be inside an insulin pen or pump;
- controlled drugs that have been prescribed for a child will be stored securely in a non-portable container and only named Academy staff will have access;
- controlled drugs will be easily accessible in an emergency at all times; and emergency medicines such as asthma medication, adrenaline pens and diabetes medication should be with the child or readily available – not locked away.

Record Keeping:

Written records of all medicines administered to individual children will be kept with the medication detailing what, how and how much was administered, when and by whom. (See appendix C for the DLPT's record form of medicine administered to an individual child.)

These accurate records offer protection to staff and children, whilst providing evidence that agreed procedures have been followed.

Parents will be informed when their child has been unwell at school by a member of the Senior Leadership Team.

Controlled Drugs:

Controlled drugs must be kept in a locked non-portable container. There must be named members of staff who have access to this container. A record must be kept when this container is opened and when controlled drugs are administered. Two members of staff should **ALWAYS** be present when controlled drugs are administered or when the container with controlled drugs in it is opened. (See appendix D for the DLPT's Controlled Medication Record sheet.)

Disposal of Medicines:

Staff should not dispose of medicines. Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. They should also collect medicines held at the end of each term.

Emergency Procedures:

In emergency situations, where possible, the procedure identified on a child's Individual Health Care Plan will be followed. When this is not available, a qualified First Aider will decide on the emergency course of action.

Off-site procedures:

Each Academy will assess what reasonable adjustments can be made to enable pupils with medical needs to participate fully and safely during off-site trips.

All staff members should be aware of how the pupil's individual medical condition will impact on their participation, but should allow enough flexibility for pupils to participate according to their own abilities, unless evidence from a GP states otherwise.

A risk assessment will be carried out by a member of the Senior Leadership Team prior to the off-site trip, to ensure pupils with medical conditions can participate safely. This will require consultation with parents and pupils and advice from the relevant healthcare professionals.

Unacceptable practice:

Staff should use their discretion and judge each case on its merits with reference to the child's Individual Health Care Plan. However, it is not general acceptable practice to:

- assume that every child with the same condition requires the same treatment;
- prevent children from accessing their inhalers or medication easily, and administering their medication when and where necessary;
- send pupils to the school First aid room unaccompanied or with someone unsuitable, if the pupil becomes ill;
- send pupils with medical conditions home frequently or prevent them from participating in normal school activities, unless specified in their Individual Health Care Plan.

- penalise pupils for their attendance record, if absences relate to their medical condition i.e. hospital appointments;
- ignore the views of the pupil or their parents; or ignore medical evidence or opinion, (although this may be challenged);
- prevent children from drinking, eating or taking toilet breaks whenever they need to, in order to manage their medical condition effectively;
- create barriers to pupils participating in any aspect of school life, including off-site school trips; or
- require parents to attend school to administer medication or provide medical support to their child, where arrangements have been agreed as part of the child's Individual Health Care Plan.

No parent should have to give up working because their child's school is failing to support their child's medical needs.

Insurance:

The Academy provides the appropriate level of insurance to cover staff providing support to pupils with medical conditions in line with this policy and the pupil's Individual Health Care Plan.

Complaints:

Should parents or pupils be dissatisfied with the support a DLPT Academy has provided, the initial concern should be raised with the Headteacher / Head of School. If the concern cannot be resolved with the school directly, a formal complaint can be made via the school's complaints procedure, which is accessible from the school website or on request from the school office.
