As Upper KS2 Designers we will learn to:

- research, including using ICT to find other peoples' designs that are in use, to adapt for our own designs.

- explain how or why someone else's design fits with the needs of people or places.

- design a range of different designs and choose the most appropriate (best).

- explain why we have made our particular choices.

- think about the time we have to make our product and make sure we use the time wisely to finish it.

- show that we have thought about materials and cost.

- record our ideas using annotated diagrams.

- Record my ideas using plans.
